EDUCATION

UNIVERSITY OF MICHIGAN

B.S Computer Engineering (Honors); Minor in Business (Ross), GPA: 3.95/4.00

SUMMARY

First-principles problem solver. 8+ years building with enterprise rigor and startup pace. Start and scale zero-to-one teams operating as an autonomous startup while balancing hands-on technical contributions with executive decision making.

EXPERIENCE

Feb. 2026 - PRESENT

DELL

Director of Engineering, Applied AI

Austin, TX

- Building a custom AI orchestration platform across 100% of product organization repositories, leveraging a custom agent harness, driving a 10x - 15x increase in developer velocity compared to off-the-shelf AI IDEs.
- Extended the platform beyond software development by integrating agents with hardware/camera/debug testbeds to automate real-world validation loops.
- Started and scaled the Applied AI team, establishing a high-ownership "build and iterate" engineering culture.
- Bridged the gap between software agents and hardware constraints to drive innovation, velocity, responsiveness across the PC product portfolio.

Oct. 2024 - Feb. 2026

DELL

Austin, TX

Senior Engineering Manager, Dell Pro AI Studio

- Built a first-of-its-kind developer platform enabling AI application development across Dell's AI PC ecosystem, taking it from POC to product launch in 6 months with customer adoption shortly thereafter.
- Balanced strategic leadership with hands-on building by defining product direction, making critical technical tradeoffs, and contributing production code, bug fixes, and implementation alongside the team. *Featured at Dell Tech World as a flagship AI initiative, driving industry visibility.*

Oct. 2021 - Oct. 2024

DELL

Austin, TX

Engineering Manager, Dell Trusted Device (DTD)

- Created and launched the first *cloud-based supply chain verification product*, enabling customers to validate device integrity on delivery and creating a recurring-revenue stream and a first-to-market differentiator.
- Owned full lifecycle delivery - balancing roadmap strategy with hands-on design and technical reviews; translating business needs into shipping features..

Oct. 2019 - Oct. 2021

DELL

Austin, TX

Senior Software Engineer, Security Solutions Group

- Owned overhaul of BIOS code signing infrastructure, designing signing tools to reduce release risks and improved resilience of security updates.

Aug. 2017 - Oct. 2019

DELL

Austin, TX

Software Engineer, BIOS Security Features

- Hardened BIOS code to support Intel Runtime BIOS Resilience and Microsoft SystemGuard; ultimately leading to Intel calling the Latitude 7400 "the latest in commercial system design".

ADDITIONAL

- Certified Information Systems Security Professional (CISSP), September 2021
- Achieved rank of Eagle Scout, March 2012
- Technologies: .NET, Python, Agent Harnesses, UEFI/BIOS Security, C/C++
