EDUCATION

UNIVERSITY OF MICHIGAN

B.S Computer Engineering (Honors); Minor in Business (Ross), GPA: 3.95/4.00

SUMMARY

First-principles problem solver. 8+ years building with enterprise rigor and startup pace. Proven track record taking products from POC to launch with aggressive timelines while balancing hands-on technical contributions with executive decision making.

EXPERIENCE

Feb. 2026 - PRESENT

DELL

Director of Engineering, Applied AI

Austin, TX

- Building AI orchestration platform at scale across Dell's entire product organization on a custom agent harness to optimize the entirety of the PC product lifecycle.
- Started and scaled the Applied AI team, establishing a "build and iterate" culture. Directly bridged the gap between software agents and hardware constraints to drive innovation, velocity, responsiveness across the PC product portfolio.

Oct. 2024 - Feb. 2026

DELL

Austin, TX

Senior Engineering Manager, Dell Pro AI Studio

- Drove Dell Pro AI Studio (Project Antares) from POC to product launch in just 6 months. Lead a global, cross-functional team to deliver a first-of-its-kind developer framework for Dell AI PCs. *Achieved customer adoption within months of launch.*
- Balanced strategic leadership with hands-on building—drove strategic clarity through ambiguity, made tradeoff decisions, and maintained direct involvement in design and implementation by writing code, fixing bugs, and triaging issues alongside developers. *Featured at Dell Tech World as a flagship AI initiative, driving industry visibility.*
- Scaled and mentored a diverse team of engineers including new grads and interns, fostering a culture of rapid iteration, technical rigor, and customer focus - fostering a startup-style "build and iterate" culture inside a Fortune 500.

Oct. 2021 - Oct. 2024

DELL

Austin, TX

Engineering Manager, Dell Trusted Device (DTD)

- Led a cross-functional team delivering *Dell's first cloud-based supply chain verification product*, enabling customers to validate device integrity on delivery and creating a recurring-revenue stream and a first-to-market differentiator.
- Owned full lifecycle delivery - balancing roadmap strategy with hands-on design and technical reviews; translating business needs into shipping features..

Oct. 2019 - Oct. 2021

DELL

Austin, TX

Senior Software Engineer, Security Solutions Group

- Spearheaded overhaul of Dell's BIOS code signing infrastructure, designing signing tools and strengthening CI/CD pipelines to reduce release risks and improved resilience of security updates.

Aug. 2017 - Oct. 2019

DELL

Austin, TX

Software Engineer, BIOS Security Features

- Led a team of five engineers hardening a substantial portion of Dell BIOS code to support Intel Runtime BIOS Resilience and Microsoft SystemGuard; ultimately leading to Intel showcasing the Dell Latitude 7400 at Computex, calling it "the latest in commercial system design".

ADDITIONAL

- Certified Information Systems Security Professional (CISSP), September 2021
- Achieved rank of Eagle Scout, March 2012
